**Taiwan , May 09 ,2005**

**VOSONIC TO RELEASE NEW FIRMWARE UPDATE VERSION 0A.1-1-5**
**FOR MODEL : VP6210 / VP6300**

The new firmware update for Model: VP6210 / VP6300

- Fix MPEG-1 decoder for some machines can't display correctly for the
  first time after powering on.
-Add supporting for Pentax camera RAW (.PEF).
- Add supporting for MJPEG for Panasonic DMC-F1 MOV files.
- Add supporting for NIKON D100 *NEF files.

We'd strongly recommend customers in other markets try and use this firmware -
and we'd expect it will improve and advance the performance.
